Slope Angle: 26°
Wind Loading:

Stability: Good
Air Temperature: -4.5°C
Sky Cover: FEW
Precipitation: NO
Wind: Calm

HS:55
PS:2
54.5-52cm: 11/27 Rain-sandwich
52-51cm: 11/27 sandwich
51-50cm: 11/27 sandwich
44-36cm: faceting starting
19-0cm: some striation
[\[More Layer Comments below\]](#)

Specifics: Pit dug in a Ski Area; Pit is representative of backcountry; We skied slope

Notes: Previous NE wind scoured down to 11/27 rain crust. 4mm surface hoar overnight almost attached to surface of semi-breakable crust. Ski pen only 2cm but boot pen 41cm. First pit of the season to see how current cold temps affecting early season pack and gauge how additional load will affect. Additional Layer Comments: 0-19cm: Problematic layer;
