

Wimpys
 Teton Range
 WY
Elevation: 9000 ft
Aspect: E
Specifics: Cracking; Ski tracks on slope

Brenden Cronin
 01/08/2017 - 2:30pm
Co-ord:
Slope Angle: 32°
Wind Loading: previous

Stability:
Air Temperature:
Sky Cover: OVC
Precipitation: S1
Wind: SW Light Breeze

HS:260
PS: 15 214-211cm:Problematic layer

Notes: We did not ski this particular slope but headed south and skied a similar slope.
 Observed some cracking on NE aspect as we traversed towards our ski run.
