Stability:
Air Temperature:
Sky Cover: BKN
Precipitation: S-1
Wind: E Moderate

HS:200
Layer Notes:
90-97cm: bed surface @ 97
90-97cm: Problematic layer

BC
Elevation: 1695 m
Aspect: SE
Specifics: Pit is adjacent to avalanche: crown;

Co-ord: 56.55906N, -126.08190W
Slope Angle: 35°
Wind Loading: previous

Notes: Fracture line profile for 181214 Sa. Avalanche propagated from a shallow area. Slab dimensions: 65m X 235m, ran 130m vertical, terminated in track, crown 30-135cm. No burial - skier remained at trigger spot at the side of the slab.
