

Trapper Creek NE

Eric Knoff

01/10/2017 - 1:00pm

Stability: Fair Stable

HS:100

Layer Notes:

MT

Co-ord:

Air Temperature: -5°C

PF:100 20-0cm: Problematic layer

Elevation: 9300 ft

Slope Angle: 35°

Sky Cover: OVC

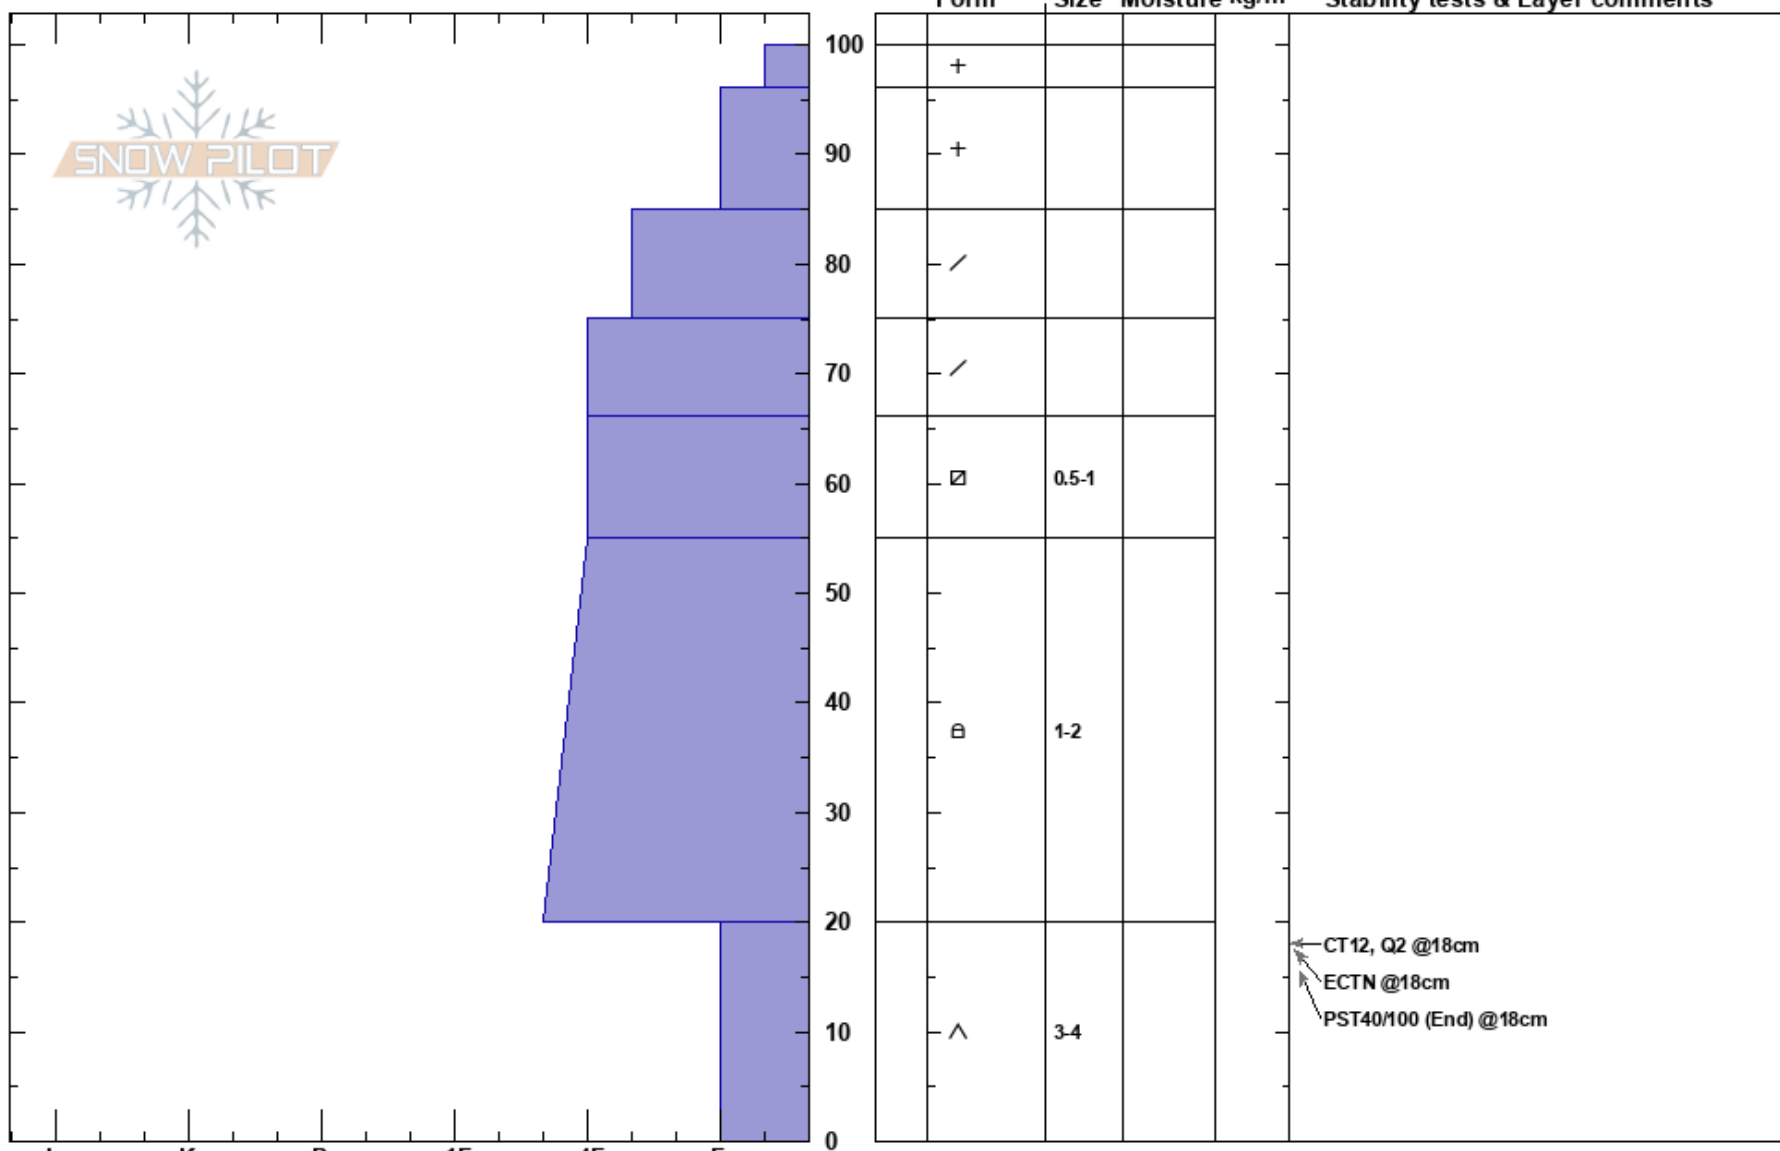

Aspect: 50°

Wind Loading:

Precipitation: NO

Wind: SW Moderate

Specifics: We skied slope

Notes: The snowpack on this aspect was deeper, but still non-cohesive. The lack of a cohesive slab was preventing conditions from being unstable.
