**Co-ord:** 52W 115N  
**Slope Angle:** 15°  
**Wind Loading:**

**Stability:**  
**Air Temperature:** -8°C  
**Sky Cover:** BKN  
**Precipitation:** NO  
**Wind:** W Moderate

**HS:**110  
**PF:**110 51-91cm:Problematic layer

**Notes:** Touring up was work - constantly collapsing onto facets and often the skis got stuck in the facets and you couldn't break through the surface above. I didn't get the elevation however, we were a ways from the top of the glades when we determined it wasn't getting better. We tip-toed down our uptrack. Snow coverage was thin and there were a lot of small evergreens and alders.
