 01/06/2019 - 3:00pm
Co-ord: 12T 362291E 5306799N
Slope Angle: 37°
Wind Loading: no

Stability:
Air Temperature:
Sky Cover: BKN
Precipitation: NO
Wind: W Strong

HS: 75
Layer Notes:
 45-33cm: Layer seemed older. Nov?
 32-29cm: Fx layer
 32-29cm: Problematic layer
 29-25cm: Bed surface in crown
 25-0cm: Some frozen chunks here

Notes: Dug in thinner part of crown roughly above where slide triggered. Crown face height varied noticeably within 20 m of profile site - 1 to 4+ ft. Basal DH thinner a few feet away. In profile, crust @ 28 was bed surface, but could easily have been FC below elsewhere. Time and conditions (winds) prevented more detailed profile.
