HS:205  
 122.5-119cm:Problematic layer

**Notes:** Avalanche. Unsure if sled triggered or not. It broke at 122.5 cm. The facets were hard to find. This snowpack (at the crown) was much deeper than one nearby (125cm). I think it gets some wind drifting along the road. Just 100yds up the road are commonly found drifts.
