HS:280  
Layer Notes:  
240-230cm: Problematic layer  
137-115cm: Bottom of Pit

**Notes:** HMH TS Recon. No Collapsing, No Cracking, No Whoomphing. No results on ski cut. Pit was dug in gladed area and was not representative of snow in open areas in the same run which were faceted and thinner due to wind exposure. Structure was best seen in region. No obvious signs of instability. Pit dug to 115 cm.
