

Croy Canyon  
 Smoky  
 ID  
 Elevation: 5750 ft  
 Aspect: 70°  
 Specifics:

peter carse  
 02/06/2019 - 10:00am  
 Co-ord: 43.49382N, -114.36322W  
 Slope Angle: 25°  
 Wind Loading: no

Stability: Good  
 Air Temperature: -10°C  
 Sky Cover: CLR  
 Precipitation: NO  
 Wind: NE Light Breeze

HS:85  
 PF:85  
 Layer Notes:  
 19.5-0cm: Problematic layer

**Notes:** Sheltered with less evidence of wind affect here than most other places in Croy.  
 New storm snow over past 4 days bonded well to crust. Basal layers moist and rounding but still exhibiting propensity for propagation.  
 Cross slope PST 20/100 (end) under ice layer at 19.5 up from ground.  
 No cracking or collapsing noted, stability good on non-windloaded slopes of this aspect under 30°
