Cement Creak Samantha Podhurst 02/13/2019 - 3:00pm Silverton

CO Co-ord:

Elevation: 3048 m Aspect: W Wind Loading: yes

Sky Cover: OVC Slope Angle: 34° Precipitation: S1

Wind: SW Light Breeze

Air Temperature: -3.8°C

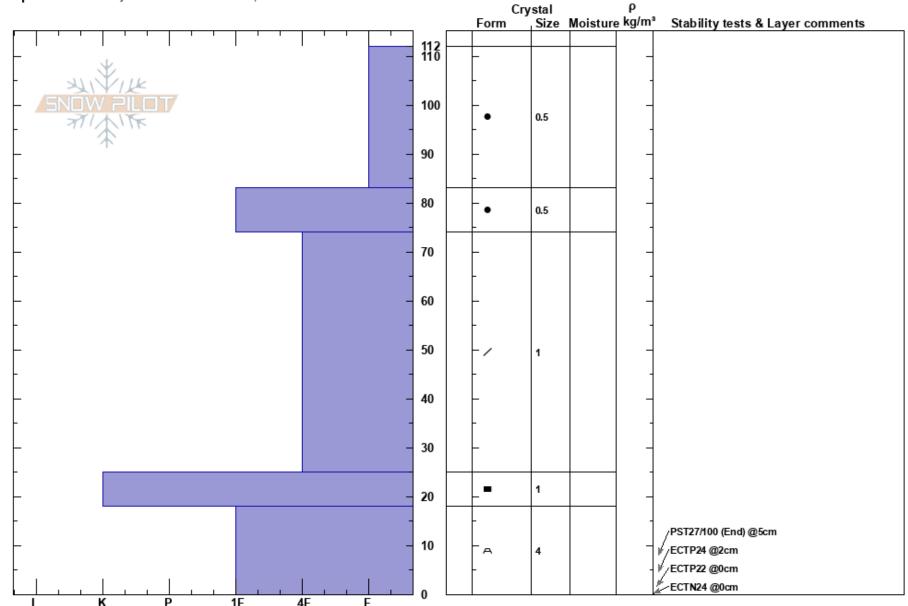

HS:112

Layer Notes:

18-0cm: Problematic layer

Stability:

Specifics: Pit is adjacent to avalanche: crown;

Notes: This is a fracture line profile performed on an slide that occurred right off State Highway 110A, on the east side of the road, across from Niagara Gulch. The approximate width was 50', track ran 80', and the length was 100'. The bed surface was a grassy slope, above a creek, with an unsupportive base.
