

Flag shot 73
Central Wasatch
UT
Elevation: 10200 ft
Aspect: 153°
Specifics:

mark saurer
03/20/2019 - 1:00pm
Co-ord: 40.59965N, -111.64630W
Slope Angle: 38°
Wind Loading: no

Stability:
Air Temperature: -2°C
Sky Cover: CLR
Precipitation: NO
Wind: SE Moderate

HS:105
PS: 5
60-58cm: weak & decomposing
60-58cm: Problematic layer

Notes: This spot high in the starting zone is much shallower than other areas on the same slope where more wind loading occurs, likely due to wind scouring and frequent sluffs. I was out looking for thinner areas to see how our recent warm-up had effected such zones.
