Mt Paganella -selletta
Trentino Alto Adige
Italy
Elevation: 1961 m
Aspect:

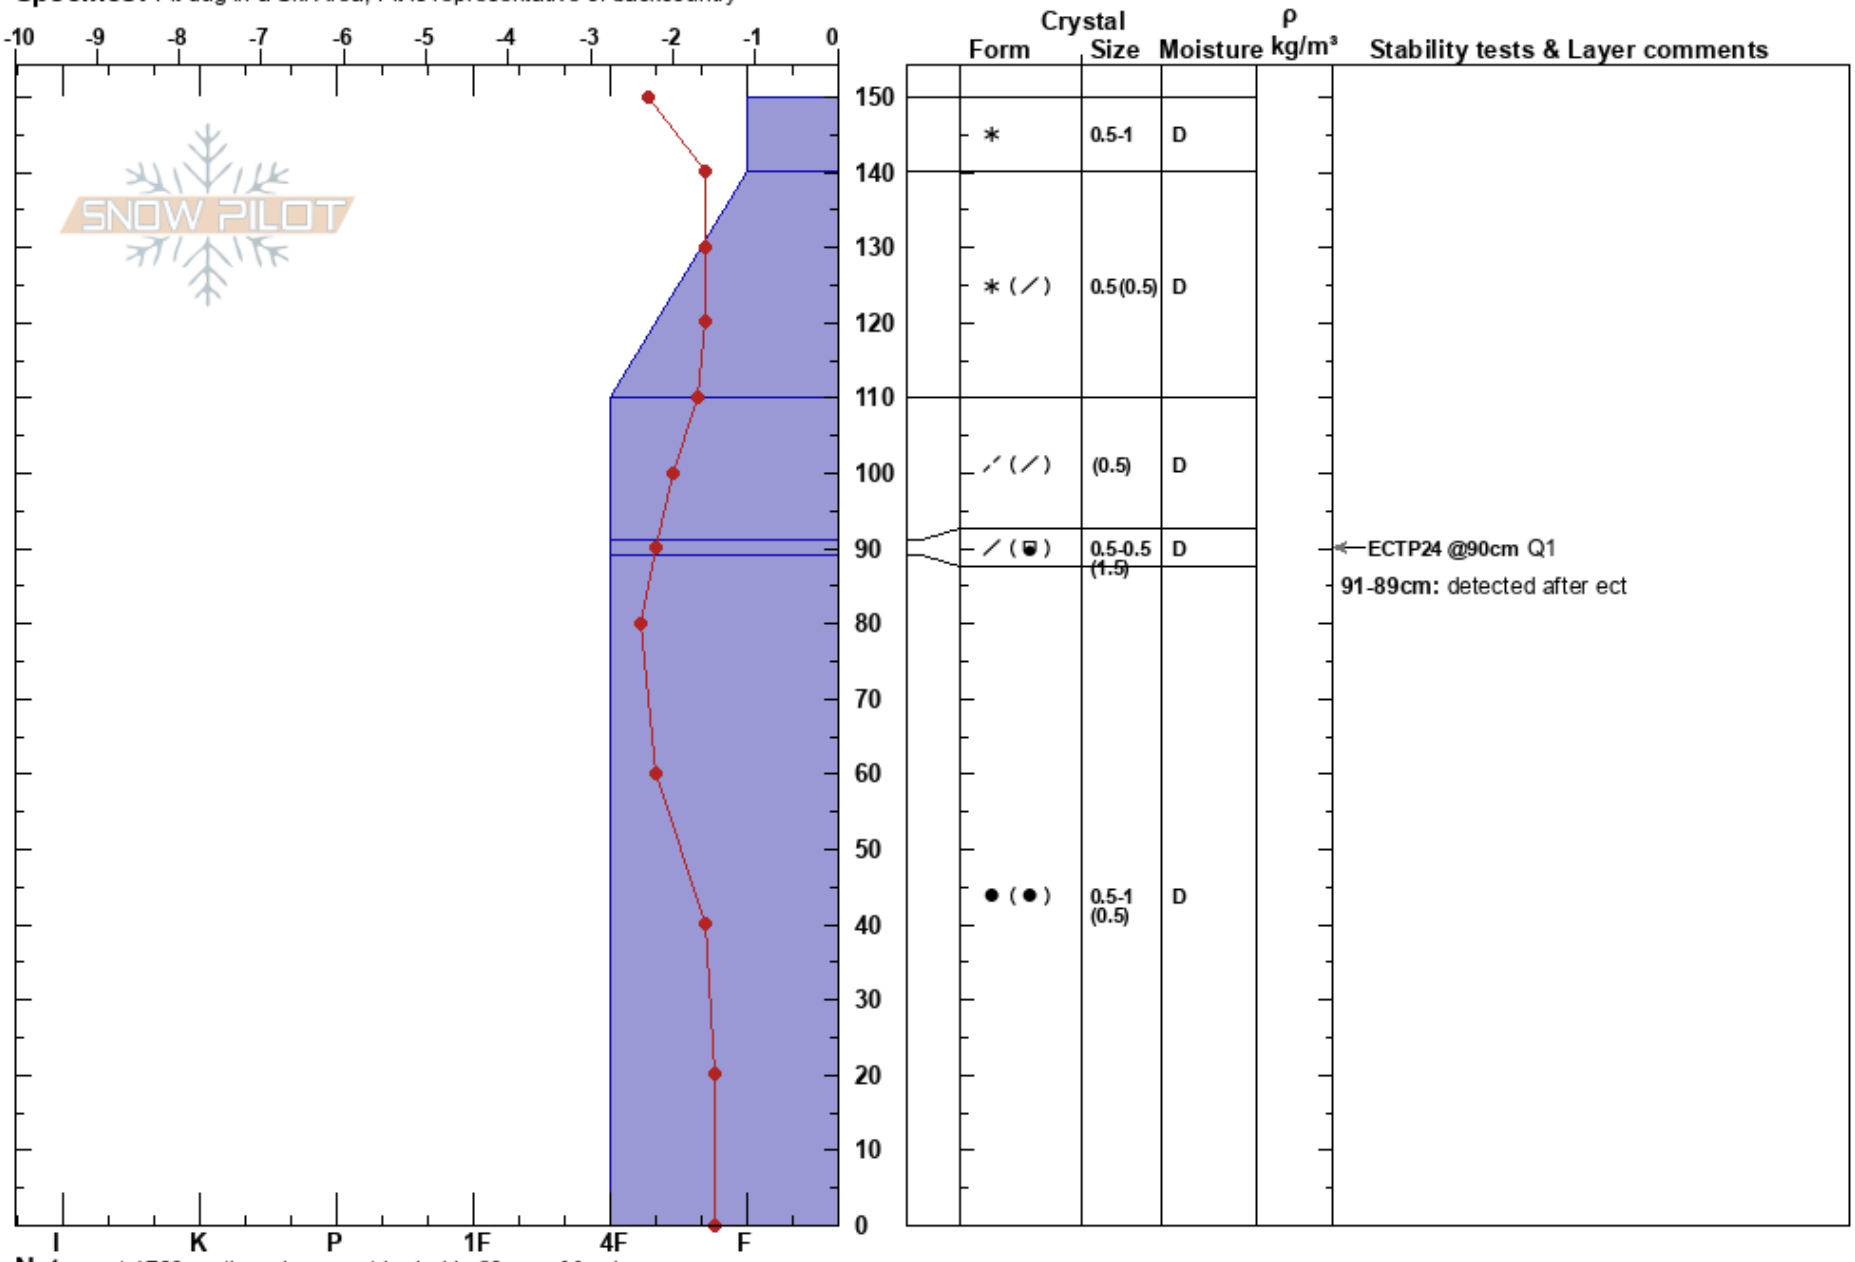

Alex Cappelletti
16/11/2019 - 10:00
Co-ord: 32T 657386E 5112585N
Slope Angle: 25°
Wind Loading:

Stability:
Air Temperature: -2.7°C
Sky Cover: BKN
Precipitation: NO
Wind: Calm

HS:150

Layer Notes:
91-89cm: detected after ect
91-89cm: Problematic layer

Specifics: Pit dug in a Ski Area; Pit is representative of backcountry

Notes: at 1700 m there is a crust buried in 20 cm of fresh snow.
No avalanches activity.
main ski route was in the forest so observations are not so rapresentative of snow stability.
many collapsed plant
