**Co-ord:** 37.84845N, -107.84010W  
**Slope Angle:**  
**Wind Loading:** previous

**Stability:** Fair  
**Air Temperature:** 7°C  
**Sky Cover:** BKN  
**Precipitation:** S-1  
**Wind:** NW Moderate

**HS:** 75  
**PF:** 75  
**PS:** 25  
 20-0cm: Problematic layer

**Notes:** 35cm of new wind blown snow has brought the scales close to tipping. Poor structure prior to the storm has a load that is now waiting for a trigger. Pit location is not loaded as much as ridgeline terrain. Expect human triggered avalanches in terrain over 35 deg.
