Slope Angle: 29°
Wind Loading:

Stability:
Air Temperature:
Sky Cover: BKN
Precipitation: NO
Wind: SW

HS:105
Layer Notes:
50-49cm: Problematic layer

Notes: Localized wind effect, and drifts that were pencil hard and were sensitive to the weight of a skier, in areas along the NE ridge (from recent northerly winds). These areas did not appear to be widespread. One natural avalanche observed on an upper elevation east/ NE aspect near by, just lookers left of the Fin. The avalanche appeared to have started from a cornice fall.
