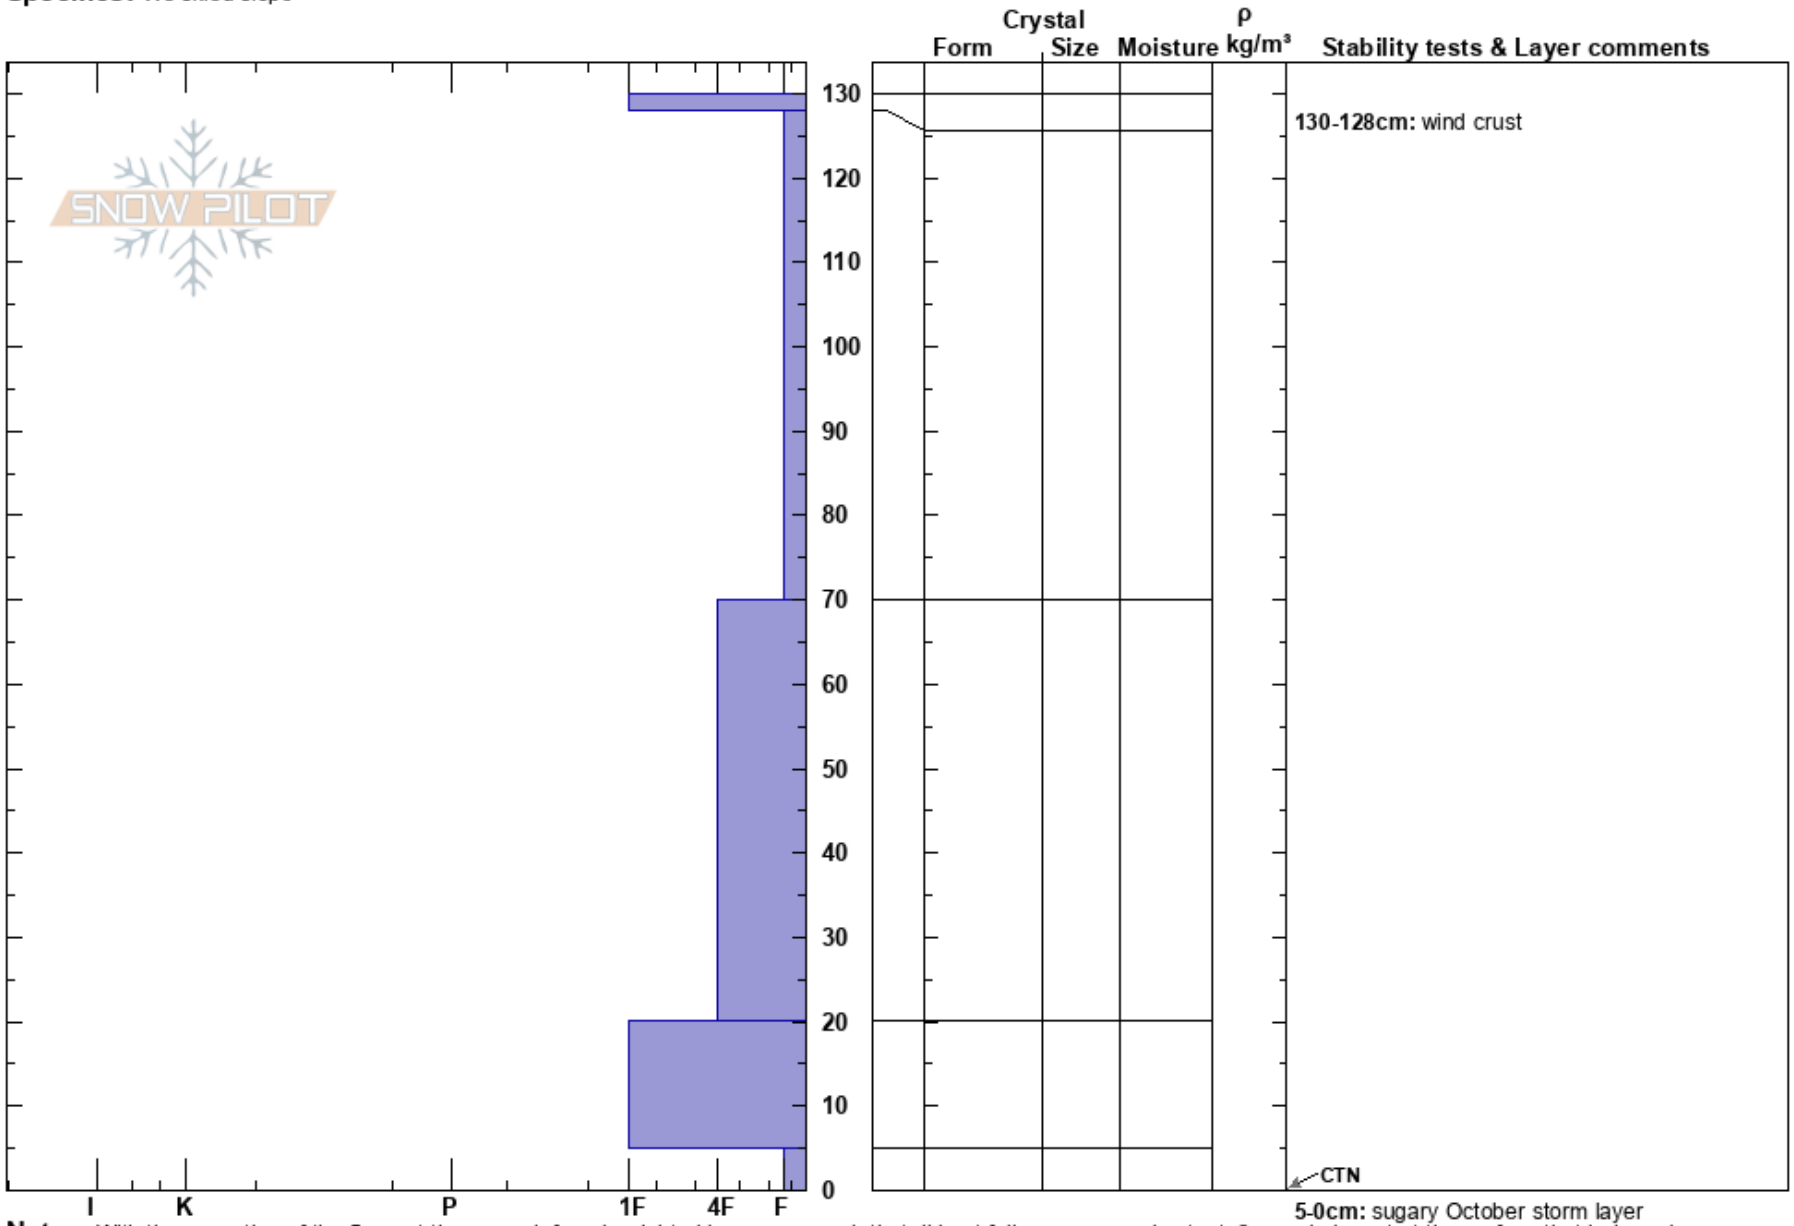
12/21/2019 - 1:45pm
Co-ord: 41.37603N, -111.95253W
Slope Angle: 20°
Wind Loading: yes

Stability: Very Good
Air Temperature:
Sky Cover: OVC
Precipitation: NO
Wind: Moderate

HS:130
PF:20

Layer Notes:
130-128cm: wind crust
5-0cm: sugary October storm layer
5-0cm: Problematic layer



Notes: With the exception of the 5 cm at the ground, found a right-side-up snowpack that did not fail on compression test. 2 cm wind crust at the surface that behaved as a coherent layer and may be of future concern. Entire 125 cm block slid on the bottom 5 cm weak layer when pushed.
