

Silver mountain check Katrina Roloff
Silver Valley Area 12/26/2019 - 1:00pm
ID Co-ord: 47.48895N, -116.13208W
Elevation: 5955 ft Slope Angle: 34°
Aspect: NW Wind Loading: previous
Specifics: Pit dug in a Ski Area; Ski tracks on slope; We skied slope

Stability: HS:85
Air Temperature: -8.6°C PF:40
Sky Cover: OVC PS:20
Precipitation: NO
Wind: Calm

Layer Notes:
35-34cm: Problematic layer
25-0cm: Ground- branchy

Notes: We were in a location that may have experienced an avalanche previously, causing basal facets to be more affected by the rain during the 12/19-12/21 storm cycle. We dug to the ground, which was very brushy. The ECT test did not slide freely when it broke at the ground (I would consider shear quality to be Q2 because of this).
