

Burgi - center TK  
 Ominecas  
 BC  
**Elevation:** 1663 m  
**Aspect:** S  
**Specifics:**

Bryce Anderson  
 01/01/2020 - 11:10  
**Co-ord:** 56.58360N, -126.15309W  
**Slope Angle:** 29°  
**Wind Loading:**

**Stability:**  
**Air Temperature:** -5.9°C  
**Sky Cover:** OVC  
**Precipitation:** S-1  
**Wind:** SW Light Breeze

**HS:**139 **Layer Notes:**  
**PF:**50 111-107cm: decomposed MFcr  
 107-88cm: well rounded FCxr  
 88-71cm: well rounded FCxr  
 71-31cm: well rounded FCxr  
 31-0cm: some MFpc

**Notes:** - Site characteristics: middle of the lower track of Burgi; ground was small boulders.  
 - 88-71: had variable densities likely due to old avalanche debris.  
 - Two compression tests were performed.  
 - There was a small shrub and hole in the corner making a thicker DH layer than other areas of the pit.
