 12/31/2019 - 1:00pm
Co-ord: 35.33269N, -111.64400W
Slope Angle: 40°
Wind Loading: no

Stability:
Air Temperature: HS:130
Sky Cover: CLR
Precipitation: NO
Wind: Calm

Layer Notes:
 PF:60

Notes: Pit dictated from a distance. Pit measurements from Miguel Fernandez, who stated that he had not dug a pit in over two years, while living in Bolivia. Slope appeared to have some debris on slope, likely from a very small SS release during the Christmas storm cycle. Looks similar to a nearby pit dug at lower elevation on easterly slope, 5 days prior - <https://snowpilot.org/node/19348>
