

Jims Creek Grandby
 Front Range
 CO
 Elevation: 9780 ft
 Aspect: N
 Specifics:

Eric Falconer
 03/02/2017 - 11:30am
 Co-ord: 39.87617N, -105.72435W
 Slope Angle: 27°
 Wind Loading: previous

Stability:
 Air Temperature: -8°C
 Sky Cover: CLR
 Precipitation: NO
 Wind: NW Light Breeze

HS:165
 PS: 10 100-75cm:Problematic layer

Layer Notes:

Notes: I took a tour up Jim's creek with the intention of reckoning some new ski lines on a south facing aspect when I stumbled across a nice protected north facing sparkly open slope, I decided to dig here and investigate. The snow was still fresh from the last snow fall with some wind effect present. The snow felt fresh and right side up in the first 30cm. No real widespread crusts were present, nevertheless, my main concern would be triggering the wind slab about 40cm down. The lower half of the snow pack seemed very stable and couldn't get anything to propagate.
