

Jims creek South face  
 Front Range  
 CO  
 Elevation: 9980 ft  
 Aspect: SW  
 Specifics:

Eric Falconer  
 03/03/2017 - 12:08am  
 Co-ord: 39.87729N, -105.71884W  
 Slope Angle: 35°  
 Wind Loading: previous

Stability: **HS:85**  
 Air Temperature: 5°C  
 Sky Cover: CLR  
 Precipitation: NO  
 Wind: N Calm  
**PF:5** 80-75cm:Problematic layer  
**Layer Notes:**

**Notes:** I wanted to explore and see what was happening within the snow pack on the souther aspects. I discovered less hight of snow depth over all, a melt freeze crust and a semi cohesive grain type throughout the snow pack. The temp profile indicates that possible isothermal temps are in the future. Would not recommend yet for skiing.
