

South of Teton Pass
 Teton Range
 WY
Elevation: 8630 ft
Aspect: 240°
Specifics:

Don Sharaf
 03/20/2020 - 10:02am
Co-ord: 43.49295N, -110.95633W
Slope Angle: 18°
Wind Loading:

Stability: Good
Air Temperature:
Sky Cover: X
Precipitation: S-1
Wind: NE Light Breeze

HS:89
PF:25
PS: 5
 45-30cm: Problematic layer
 30-0cm: Var. hard decomp. crusts

Notes: Pit dug in shallow area to target weak snow. This structure was limited to this shallow zone and does not reflect the general stability picture at the time. Full study pit process video-taped. Pit dug with Sarah Carpenter.
