Co-ord: -45.06067N, 168.82828W
Slope Angle: 35°
Wind Loading: previous

Stability: Fair
Air Temperature:
Sky Cover: CLR
Precipitation: NO
Wind: Calm

HS:90
PS: 2
35-32cm: Problematic layer

Layer Notes:

Notes: Went to investigate report of Nc Sz 2.5 Sp ~1900m that occurred on 200713 in the Doolans. Crown 50-200cm deep, 100m wide going 200m long MR. Avalanche seems to have been triggered in a shaded SW asp while we dug in the crown wall facing E which could explain ECTX.
