

Wawa Bowl
 Banff, Yoho and Kootenay 10/11/2020 - 12:30
 AB
Elevation: 2440 m
Aspect: E
Specifics: We skied slope

Banff Visitor Safety
Air Temperature: HS:65 PF:20
Sky Cover: OVC PS: 15
Precipitation: S-1
Wind: SW Light Breeze
 50-38cm: Nov 5th rain crust

Notes: 10 - 15 cm of low density on top of a hard crust. Similar results in a thinner snowpack area ~ 50 m to the south but correspondingly thinner.

Interestingly, Nov. 5th crust was thinner at bottom of Wawa bowl (2350m) 5-8 cm.
