East to West Traverse Mike Janes Stability: Fair HS:96 Layer Notes:
Eaglecrest 11/16/2020 - 2:00pm Air Temperature: -7.5°C Co-ord: 58.25731N, -134.51357W Sky Cover: FEW PS: 10

Co-ord: 58.25731N, -134.51357W Sky Cover: FEW PS: 10

Elevation: 2735 ft Slope Angle: 38° Precipitation: NO Aspect: 300° Wind Loading: previous Wind: N Light Breeze Specifics: Pit dug in a Ski Area: Pit is representative of backcountry: Collapsing, localized: Cracking

1F

4F

Notes: Pit dug in slightly more wind loaded location at start of East to West Traverse. Crust/ice layer at 23-24 is Freezing rain crust from 11/1-11/2 event. This layer is pretty widespread in the region at most aspects and elevations. Interesting that the compression tests failed below the crust but the ECT failed above. . possibly due to the difficulty I had cutting the back of the ECT.
