Co-ord: 43.79280N, -110.05395W  
Slope Angle: 32°  
Wind Loading: yes

Stability:  
Air Temperature: 0°C  
Sky Cover: FEW  
Precipitation: NO  
Wind: S Moderate

HS:88  
31-21cm: Problematic layer  
21-15cm: sintered facets

**Notes:** This pit was a few hundred feet downhill from an avalanche, which likely occurred a few days earlier during a significant loading event. On the failure layer, it was difficult to tell if there were facets due to wind loading in the pit. We continued to tap after the full propagation and did not have any other failures.
