

Ledges
 San Juan Range
 CO
 Elevation: 11289 ft
 Aspect: 100°
 Specifics:

Ann Mellick
 12/04/2020 - 11:00am
 Co-ord: 37.88175N, -107.72756W
 Slope Angle: 29°
 Wind Loading: no

Stability:
 Air Temperature: 1°C
 Sky Cover: CLR
 Precipitation: NO
 Wind: N Calm

HS:57
 PF:40
 PS:15
 49-31cm: Problematic layer

Notes: Not very reactive, but poor structure for future loading. Biggest concern is facets between crusts. Basal snow is welded to the ground.
