 Elevation: 9575 ft  
 Aspect: E

Bill Nalli  
 12/22/2020 - 9:00am  
 Co-ord: 40.61965N, -111.62823W  
 Slope Angle: 33°  
 Wind Loading: no

Stability: Poor  
 Air Temperature: HS:61  
 Sky Cover: OVC  
 Precipitation: S1  
 Wind: SW Moderate  
 PF:60  
 PS:20  
 61-58cm: Solstice Crust  
 35-32cm: Problematic layer

Specifics: Collapsing, widespread; Cracking; Recent avalanche activity on different slopes; We skied slope

Notes: East aspects have a P hard temperature crust at the surface from 12/21. Plenty of weak snow mid-pack just not much of slab on top of it in this location.
