

Stampede Grounds/CMR George Koch
 Canadian Rockies 23/12/2020 - 14:00
 AB
Elevation: 1816 m
Aspect: E
Specifics: Pit dug in a Ski Area; We skied slope

Stability:
Air Temperature: -5°C
Sky Cover: BKN
Precipitation: NO
Wind: W Light Breeze

HS: 182
PF: 60 31-100cm: Rds in lower area
PS: 30 146-182cm: Clusters to 5-10 mm

Notes: Site is open slope BTL flanked by trees, smooth ground, 1 major storm cycle since last ski tours.
 Objectives were to evaluate layers of concern and test stability.
 CT results were repeated, failures occurred within larger layers not on evident interfaces.
 Isolated surface hoar crystals observed in upper failure plane.
