

The Shoulder
 San Juan Range
 CO
 Elevation: 11527 ft
 Aspect: NW

Casey Franklin
 12/23/2020 - 2:00pm
 Co-ord: 37.75497N, -107.72053W
 Slope Angle: 14°
 Wind Loading: yes

Stability: Poor
 Air Temperature: -17°C
 Sky Cover: OVC
 Precipitation: S-1
 Wind: NW Strong

HS:90
 PF:60
 PS:25
 Layer Notes:
 55-25cm: Problematic layer

Specifics: Collapsing, widespread; Collapsing, localized; Cracking

Notes: Second pit of the day while looking at baseline conditions. Searching in scoured areas around the terrain you can find copious rocks, sticks, and overall low snow pack. The deposition is scattered as we have had strong winds and general winter weather orography has left numerous lenses of drifted snow in which I dug on for this profile.
