

Bald Mtn Pass

Mark Staples

Stability: Poor

HS:105

Layer Notes:

Uinta Range

01/09/2021 - 11:00am

Air Temperature:

50-45cm: Problematic layer

UT

Co-ord: 40.68557N, -110.89923W

Sky Cover:

Elevation: 10658 ft

Slope Angle: 14°

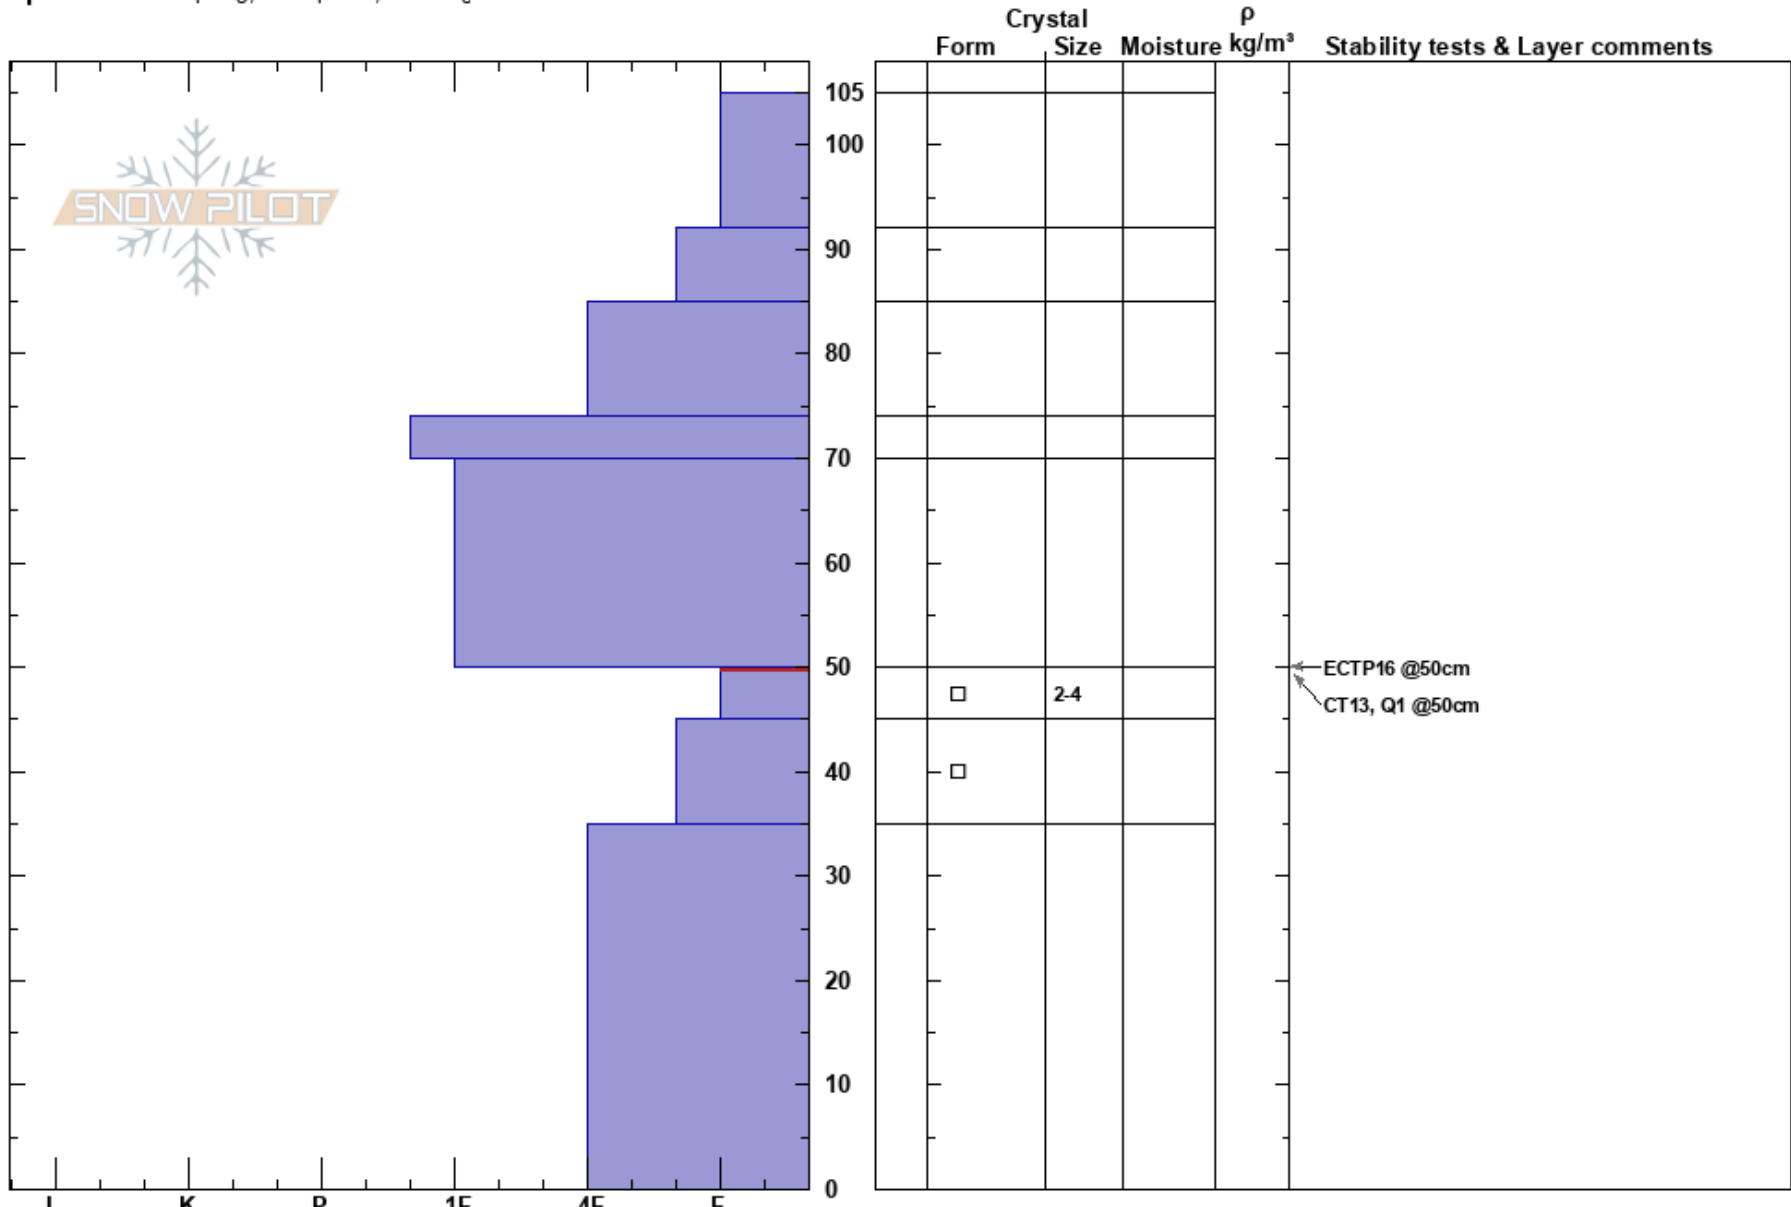

Precipitation:

Aspect: 15°

Wind Loading:

Wind:

Specifics: Collapsing, widespread; Cracking

Notes: We found similar stratigraphy, ECT scores, & snow depths on the other side of the pass. Facets at 45-50 cm look a bit dirty and this layer is easy to see in the pit wall.
