 01/09/2021 - 10:30am
 Co-ord: 43.93119N, -115.65893W
 Slope Angle: 27°
 Wind Loading:

Stability: **HS:132**
 Air Temperature: 23°F
 Sky Cover: CLR
 Precipitation: NO
 Wind: NE Light Breeze
 Layer Notes: 69-83cm: Problematic layer

Notes: No naturals seen. ECTP25 @ 83cm, 3mm collapsed weak layer was 3mm Facets
 ECT broke both horizontally and vertically at 25. Shovel pull only removed the snow directly under the tapping area. A light shovel pull removed the rest of the column, all came off smoothly at the 83cm layer.
