 01/16/2021 - 10:15am
 Co-ord: 10T 596435E 5182884N
 Slope Angle: 23°
 Wind Loading: previous

Stability: Very Good
 Air Temperature: 29°F
 Sky Cover: CLR
 Precipitation: S-1
 Wind: Calm

Layer Notes:
 4.5-5in: Problematic layer

Elevation: 7003 ft
 Aspect: 102°

Specifics: Recent avalanche activity on different slopes; We skied slope

Notes: Overnight temperatures in 20F on 01/15/21 consolidated top 6in of snowpack which contributed to high snow slope stability. The deeper layer did not freeze through and the ice layer in 4in depth has potential for stability degradation.
