

Cardiff Peak
 Northern Wasatch
 UT
 Elevation: 10150 ft
 Aspect: N
 Specifics:

Bill Nalli
 01/19/2021 - 10:00am
 Co-ord: 40.59539N, -111.65337W
 Slope Angle: 35°
 Wind Loading: yes

Stability: Poor
 Air Temperature: -11°C
 Sky Cover: CLR
 Precipitation: NO
 Wind: E Moderate
 HS:108
 PF:95
 PS: 12
 78-77cm: solstice crust
 51-41cm: Problematic layer

Notes: HS is barely one meter in late Jan. in one of the snowiest places in the Wasatch. Wild. As will the avalanches be if a load is ever applied to this structure. A couple of deteriorating crusts still exist in between progressively weaker facets toward the ground.
