Campbell Hollow Uinta Range

UT Elevation: 9737 ft

Aspect: 50°
Specifics:

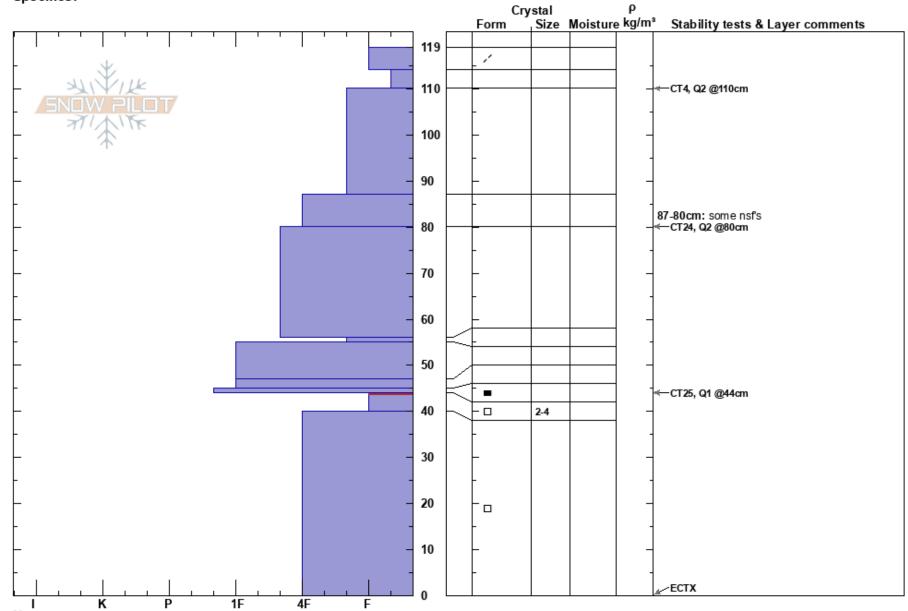

Mark Staples 01/29/2021 - 12:30pm

Co-ord: 40.45989N, -111.14962W

Slope Angle: 26° Wind Loading: Stability: Air Temperature: Sky Cover: HS:119 Layer Notes:
PF:119 87-80cm: some nsfs
44-40cm: Problematic layer

Precipitation:

Wind:

Notes: Some nsf's seen at 80 cm, this layer could be more reactive in other places. Overall this snowpack felt like a slightly deeper and stronger snowpack than we've been seeing. ECT and RB would barely break on facets at 44.
