 Slope Angle: 26°  
 Wind Loading:

Stability: HS:119  
 Air Temperature: PF:119  
 Sky Cover: 87-80cm: some nsfs  
 Precipitation: 44-40cm: Problematic layer  
 Wind:

**Notes:** Some nsfs seen at 80 cm, this layer could be more reactive in other places. Overall this snowpack felt like a slightly deeper and stronger snowpack than we've been seeing.  
 ECT and RB would barely break on facets at 44.
