

Pikes Peak N Face
Front Range
CO
Elevation: 12292 ft
Aspect: 20°
Specifics:

Steve Stowell
05/09/2021 - 10:00am
Co-ord: 13S 494102W 4302159N
Slope Angle: 29°
Wind Loading:

Stability:
Air Temperature: 0°C
Sky Cover: BKN
Precipitation: S-1
Wind: NE Light Breeze

HS:100
PF:1
PS:1
Layer Notes:
35-25cm: Hard crust layer
35-25cm:Problematic layer

Notes: This was a quick pit, estimated the profile from memory. Biggest surprise was the bottom layer of depth hoar still present after days of above freezing temps. The 10cm ice crust above it is likely holding the snowpack in place. Upper part of the snowpack was consolidated, with a couple thin ice layers.
