Co-ord: 61.77920N, -149.40524W
Slope Angle: 35°
Wind Loading: previous

Stability:
Air Temperature: -14°C
Sky Cover: SCT
Precipitation: NO
Wind: Calm

HS:58
PF:40
PS:20

Layer Notes:
58-56cm: plates and columns
56-51cm: wind broken facets
51-41cm: Problematic layer
22-13cm: some areas all crust

Notes: Isolated wind slabs from 23 November. Slab depths 10-20cm. Longest shooting crack length = 3 m. In non-winded areas the top 10-20cm was moving easily as facet sluffs on slopes > 35 degrees. Very weak snowpack, but with very isolated 2m -3m slabs the hazard remains low... for now.
