

Wolf Creek Summit
 Uinta Range
 UT
 Elevation: 9700 ft
 Aspect: 70°
 Specifics:

Mark Staples
 11/20/2017 - 8:30am
 Co-ord: 40.48648N, -111.04073W
 Slope Angle: 22°
 Wind Loading: yes

Stability: Good
 Air Temperature:
 Sky Cover:
 Precipitation:
 Wind:
 HS:65
 28-0cm: Problematic layer

Notes: It was difficult to find both a slab and weak layer. This was a wind loaded spot and had some weak snow at the ground. Other places lacked a slab but had weaker snow near the ground. I suspect you could still trigger an avalanche in a few places. Certainly you could other places at slightly higher elevation that had more early season snow, colder temperatures and more wind with the most recent storm.
