

Skunk
Columbia Mountains
BC

James Klemmensen
23/01/2022 - 13:45
Co-ord: 50.90818N, -119.92669W
Slope Angle: 20°
Wind Loading:

Stability:
Air Temperature:
Sky Cover: OVC
Precipitation: NO
Wind: W Light Breeze

HS:95
PF:60
Layer Notes:
87-74cm: Mostly RG, few FCxr @bottom
53-51cm: large striated crystals
51-48cm: large striated crystals
46-0cm: several MFcrs not recorded

Elevation: 2064 m
Aspect:
Specifics: Pit dug in a Ski Area; Pit is adjacent to avalanche

Notes: - Site selection due to proximity to Sz. 1 Xe result on 220120 which stepped down to Nov 30 MFcr.
- Examining propagation propensity on FC/ recrystallized grains atop Nov 30 MFcr. Results imperfect due to shallower snowpack at test site compared to site of avalanche.

- rounding edges on all FC layers - no temps / temp profile recorded but current temp trend favoring rounding
