 Slope Angle: 28°  
 Wind Loading: previous

Stability:  
 Air Temperature: -2°C  
 Sky Cover: SCT  
 Precipitation: NO  
 Wind: W Strong

HS:105  
 PF:3  
 Layer Notes:

**Notes:** This profile has multiple layers of concern. All the crust/facet combinations are troublesome. The crusts are 3 to 4 cm thick and very supportable. Each could be a bed surface on its own. However, future loading will determine which one and how deep failure occurs. It seems this matrix could support quite a bit of weight before it goes.
