 02/10/2022 - 11:30am
 Co-ord: 63.41297N, -145.72360W
 Slope Angle: 34°
 Wind Loading: previous

Stability: **HS:106**
 Air Temperature: -14°C PS: 16 68-64cm: Problematic layer
 Sky Cover: OVC
 Precipitation: S-1
 Wind: S Calm

Specifics: Collapsing, localized; Cracking; We skied slope

Notes: Dug pit in fairly wind sheltered spot in open woodland. Surprised by lack of facets in most of the snowpack. "Ice Sandwich" definite concern here. Wind switched from N to S around this time. On descent, storm slab (top 13cm) would release on rollovers. Localized whumping.
