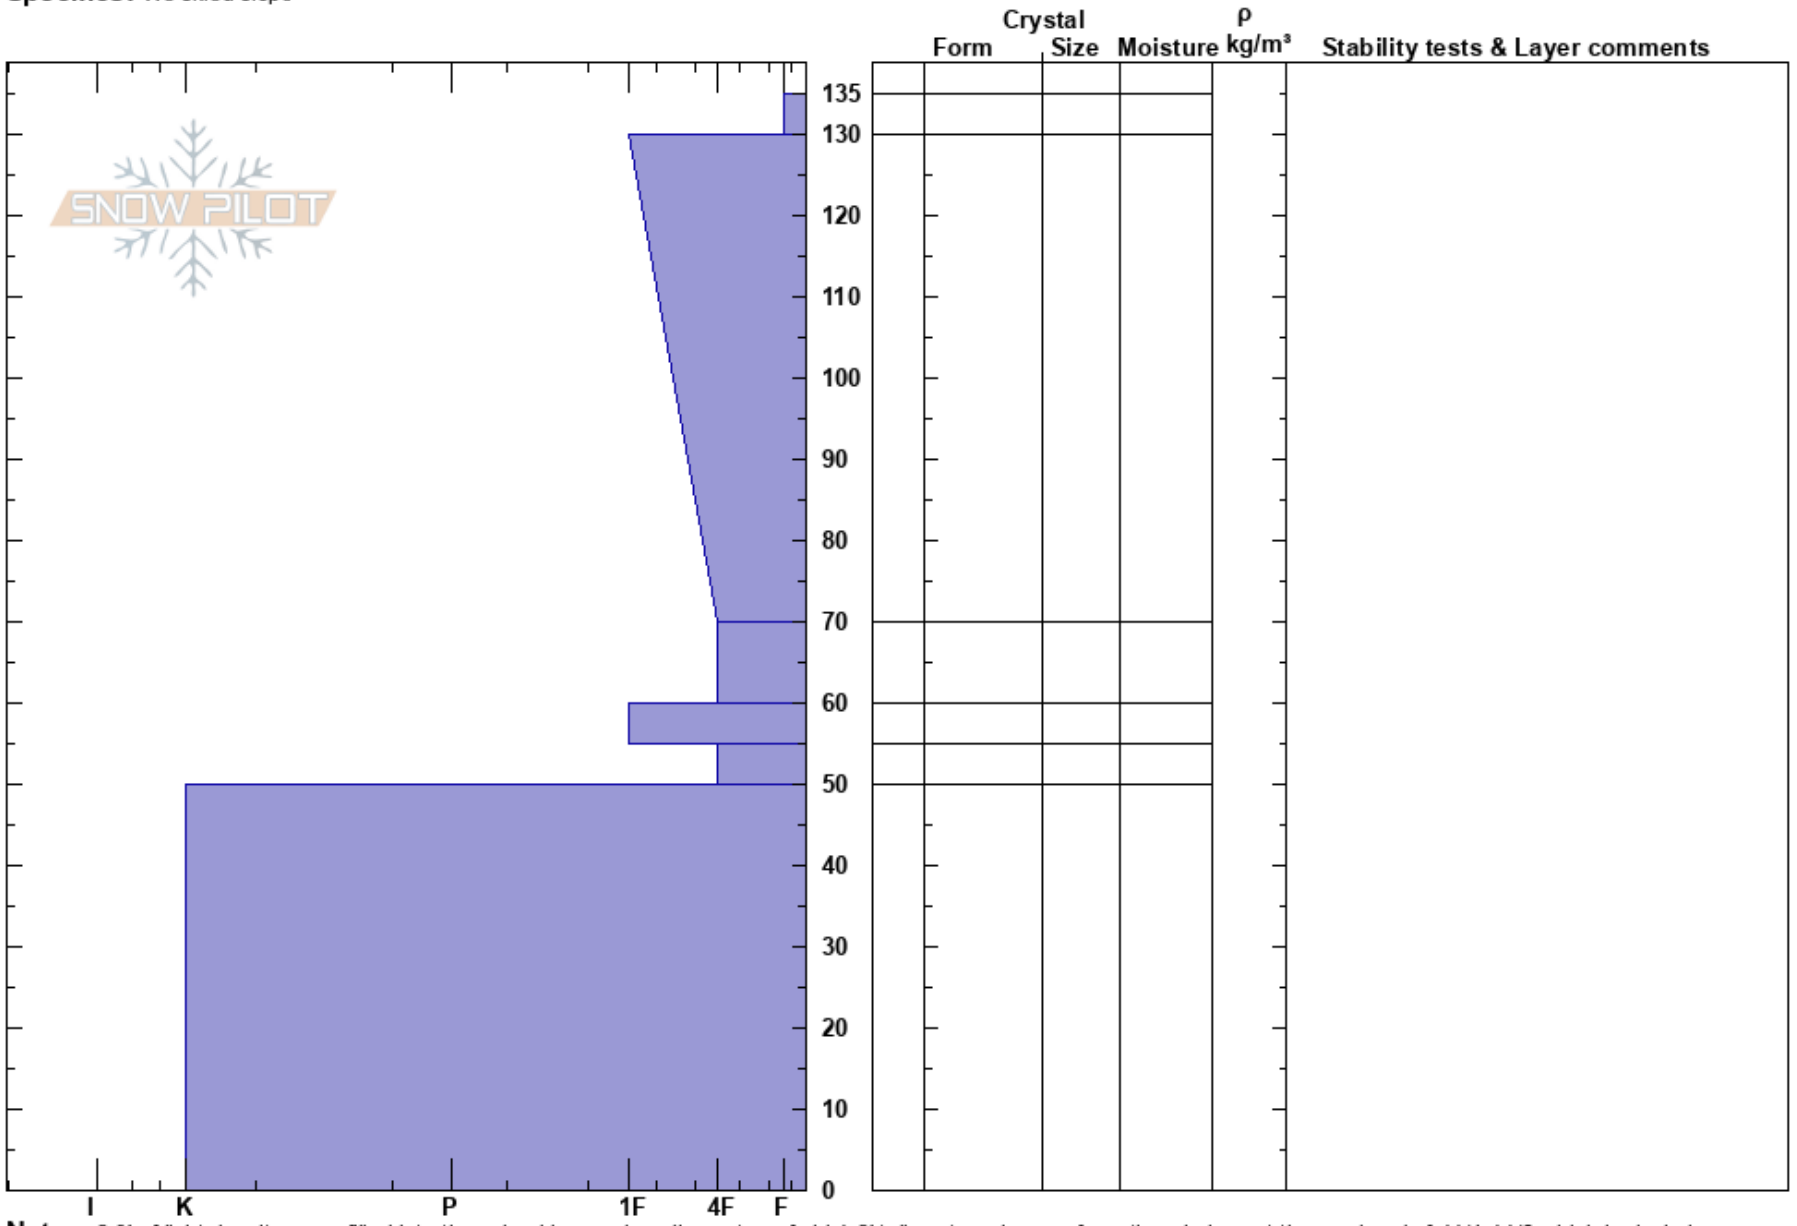
11/10/2022 - 1:05pm
Co-ord: 61.15122N, -145.68609W
Slope Angle: 35°
Wind Loading: previous

Stability: Good
Air Temperature: -6.6°C
Sky Cover: FEW
Precipitation: NO
Wind: SE Light Breeze

HS:135

Layer Notes:



Notes: 2-3' of light density snow filled into the school bus main gully, on top of old 1-2' tall sustraugi snow, from the wind event the weekend of 11/4-11/6 which had winds an estimated 50 constant to 70mph gusts. Most of the 15" of snow from 11/1& 11/2 had been completely blown away from these extreme winds. The new snow was light density pow with slight wind kissed surface, but more so loading from the SE from the storm days of 11/7-11/9. The new snow had hardly become a slab, if a slab at all.
