

east Mt. Henderson

Beau Fredlund

Stability:

HS:90

Layer Notes:

Beartooths

11/12/2022 - 11:00am

Air Temperature:

27-0cm: Problematic layer

MT

Co-ord:

Sky Cover: CLR

Elevation: 9450 ft

Slope Angle: 29°

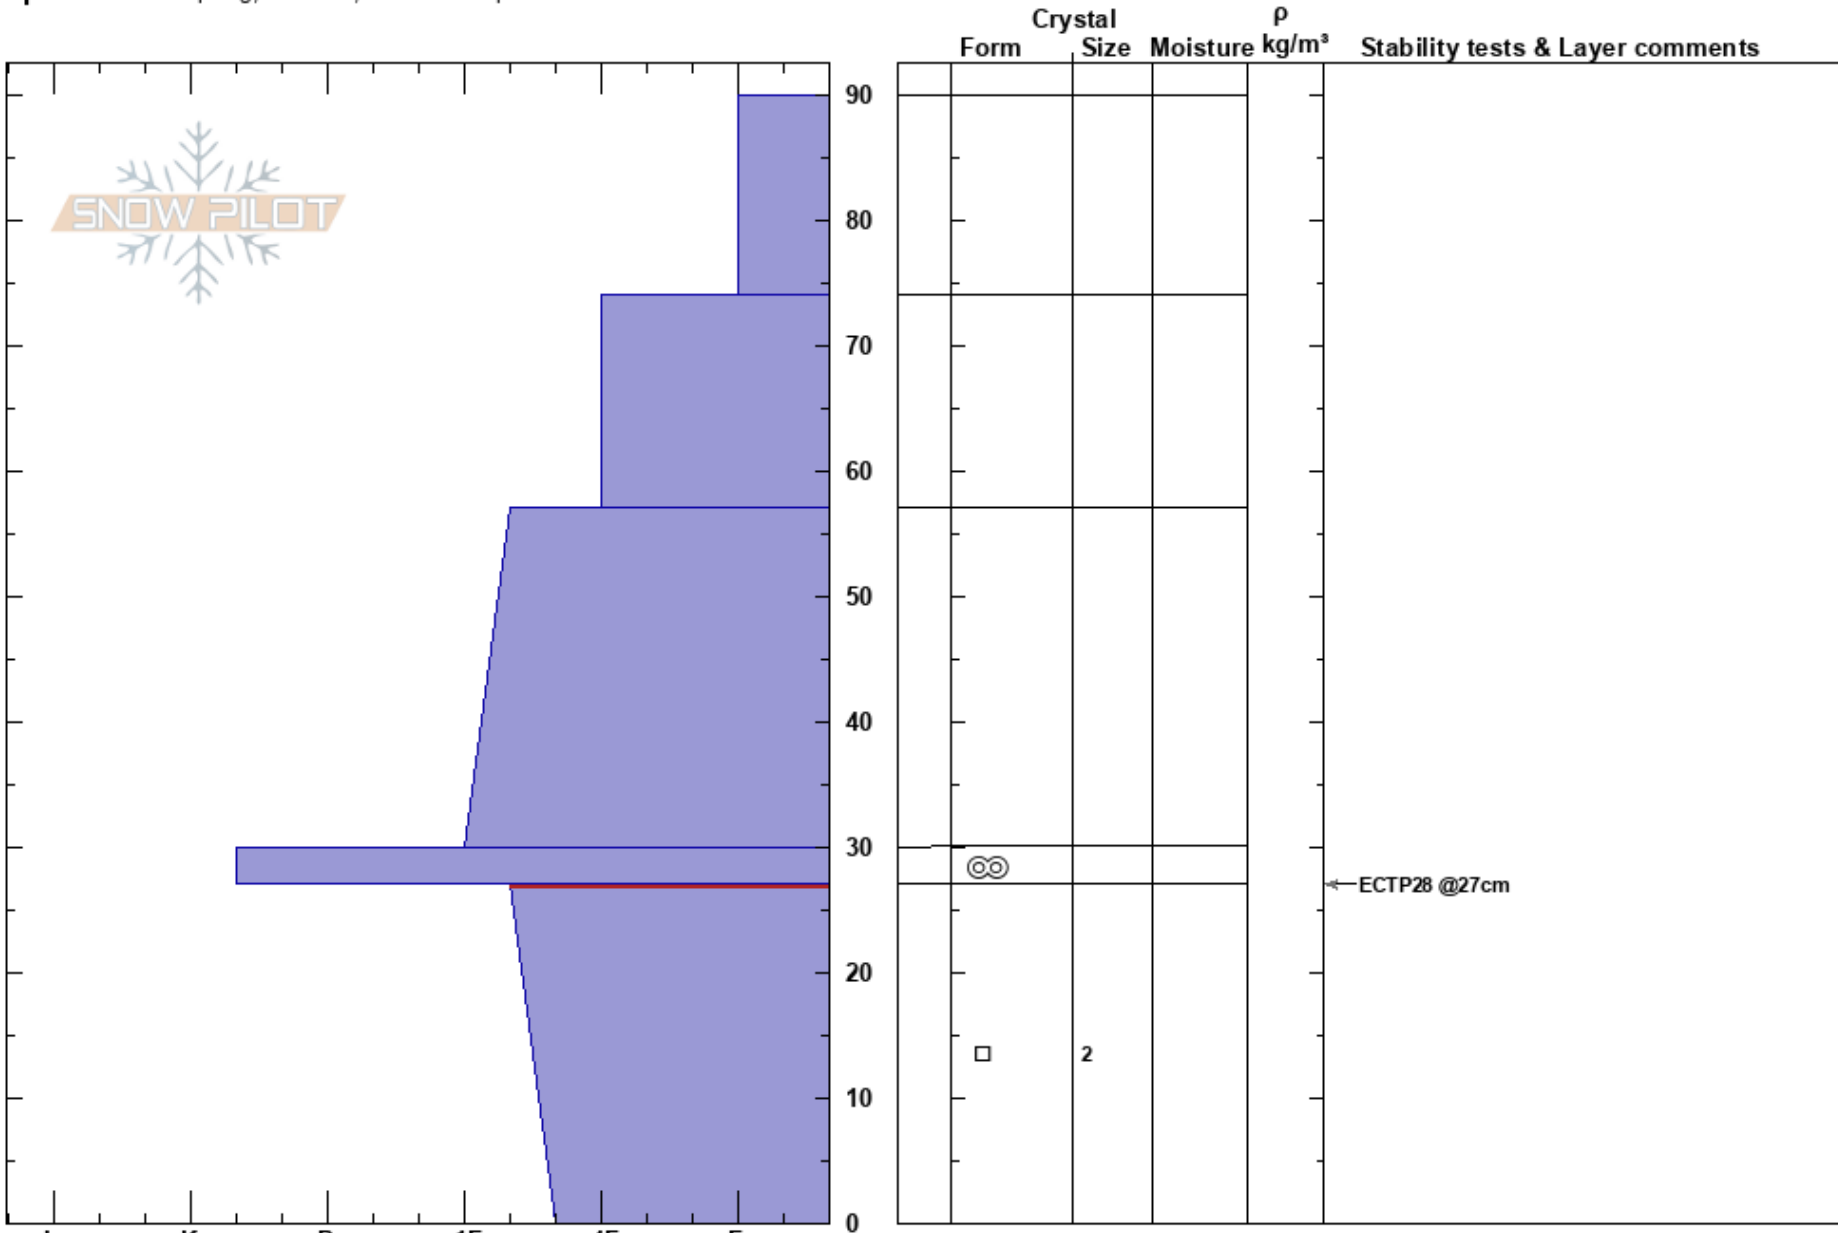

Precipitation: NO

Aspect: 95°

Wind Loading:

Wind: Calm

Specifics: Collapsing, localized; We skied slope

**Notes:** Snowpit location was in a relatively wind sheltered area. Above the snowpit location, much of the east facing terrain was significantly wind affected/ 1F snow/ from the recent storm and not optimal for skiing. It seemed like all other aspects around the Mt. Henderson area (S, W and N) had less surface wind affect.

No avalanche activity observed.
