

Top of Salto Glades
 Front Range
 CO
Elevation: 10600 ft
Aspect: 60°

Eddie Schoen
 12/18/2017 - 2:30pm
Co-ord: 39.94417N, -105.60917W
Slope Angle: 20°
Wind Loading: previous

Stability:
Air Temperature: -6°C
Sky Cover: BKN
Precipitation: NO
Wind: W Moderate

HS:83
PF:40
 83-76cm:Problematic layer

Specifics: Pit dug in a Ski Area; Pit is representative of backcountry

Notes: Stability test results duplicated on upper most windslab, layer is isolated to specific terrain features but quite touchy. Ran out of time so additional stability tests should be performed to analyze reactivity and propagation potential of several lower weak layers which are still shallow enough to be easily triggered or result in step-down activity.
