 Sky Cover: CLR
 Precipitation: NO
 Wind:

HS:152
 Layer Notes:
 61-46cm: Problematic layer

Notes: Dug below and to the right (north) of a slide triggered the day before. The avalanche appeared to break in an area with a thinner snowpack, mostly on part of the slope that was not wind loaded. The wind loaded part under the corniced ridgeline appeared to have avalanched sometime before.
