Specifics: Pit dug in a Ski Area; Pit is representative of backcountry; Collapsing, localized

No Hardness specified

Notes: This pit is located in closed terrain at the Mt Rose ski area. It is representative of the backcountry. The location is in the Chutes just below the first shot point at the top of Yellowjacket on a NE aspect below a large rock. We did not perform a column test, however we did ski cut the slope multiple times with negative results.
