Co-ord: 40.67208N, -111.66891W
Slope Angle: 31°
Wind Loading: no

Stability: Fair **HS:** 170
Air Temperature: -5°C
Sky Cover: OVC
Precipitation: S-1
Wind: SW Moderate

Layer Notes:
 112-110cm: deteriorating
 100-97cm: dirt layer-deteriorating
 57-50cm: refrozen slush
 57-50cm: Problematic layer

Notes: South facing snow pit in open area on south side of Wilson Peak. Failure at 57cm was later (27 taps) but had more snap to it. Hard to tell with frozen edges-but this would be the level of the November PWL.
