 Co-ord: 41.42236N, -111.51446W
 Slope Angle: 24°
 Wind Loading:

Stability: Very Poor
 Air Temperature:
 Sky Cover:
 Precipitation:
 Wind:

HS:94
 Layer Notes:
 44-40cm: Problematic layer

Specifics: Cracking; Recent avalanche activity on similar slopes; Snowmobile tracks on slope

Notes: Very similar snowpack structure on all shady aspects. Minimal avalanche terrain in this area so not much activity, but lots of cracking on steep road cuts.
