

1F Notes: -Profile objectives: Investigate Dec 2nd interface, asses HST bonds, test basal facets.

4F

Worth noting - the decomposing surface hoar interface 53cm down failed on CT with 2 extra hits from the shoulder SP. ECT propagated across entire column SP and slid easily with one extra hit from the shoulder.

/ECTX ECTP31 SP, dn 53 CTN, SP *CTH32 53dn - SP

-CT14, SC @102cm On FC at base

90

100 102.0

⁻Rounding, yet visible SH 3mm 53 down, 5-10cm of FC at base of snowpack.

⁻Repeated CT as first one failed at base possibly due to human error whilst isolating column.
