Stability: Good

HS:120

Layer Notes:

Teton Range

12/20/2023 - 2:30pm

Air Temperature:

88-87cm:Problematic layer

WY

Co-ord: 43.59598N, -110.86734W

Sky Cover:

Elevation: 10000 ft

Slope Angle: 36°

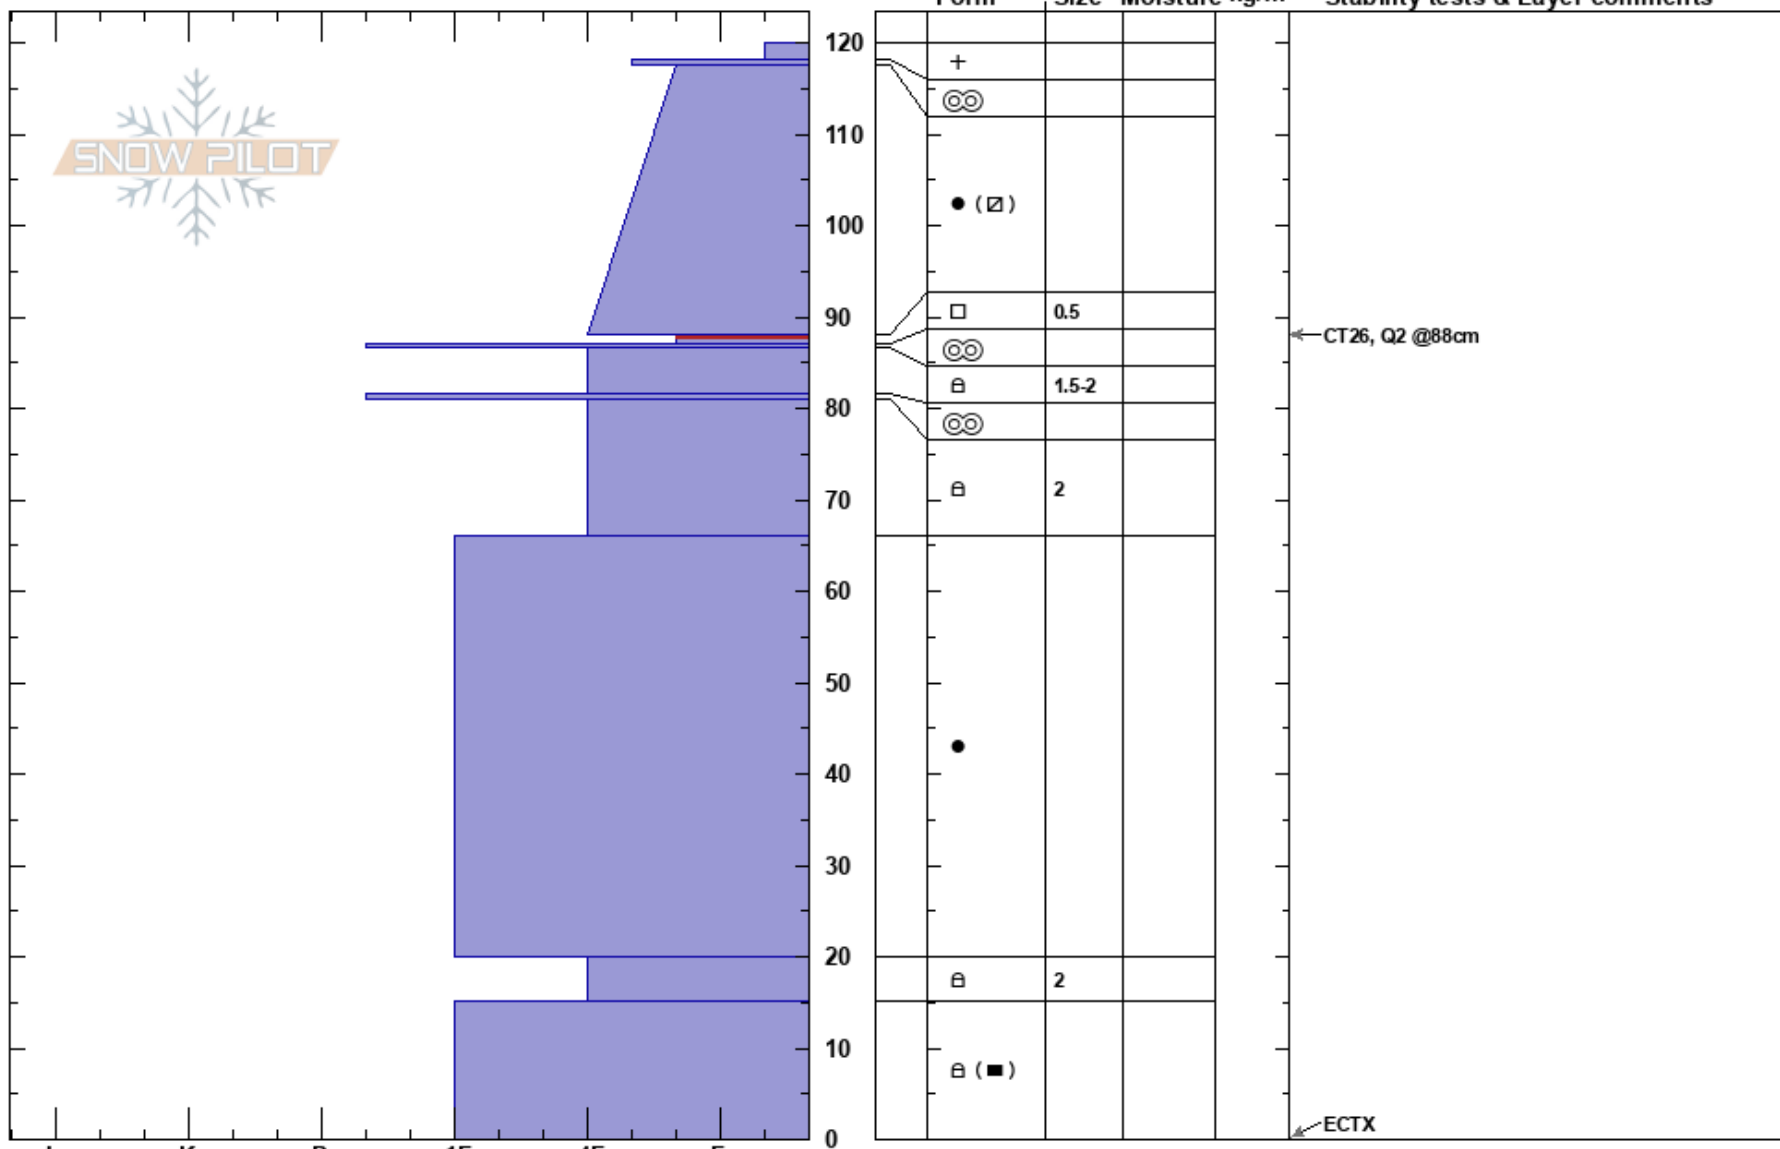

Precipitation:

Aspect: N

Wind Loading:

Wind:

Specifics: Pit dug in a Ski Area; Pit is representative of backcountry

Notes: Adjacent slope to a snowpit dug on 12/12, with no measurable precip until this morning. Ice crusts were breaking down and even less reactive then before.
